

Operator's Circular
Welding Theory and Application
REPORTING ERRORS AND RECOMMENDING IMPROVEMENTS

You can help improve this circular. If you find any mistakes or if you know of a way to improve the procedures, please let us know. Mail your letter or DA Form 2028 (Recommended Changes to Publications and Blank Forms), located in the back of this manual, direct to: Commander, US Army Ordnance Center and School, ATTN: ATSL-CD-CS, Aberdeen Proving Ground, MD 21005-5201. A reply will be furnished to you.

Table of Contents

			Paragraph	Page
CHAPTER	1.	INTRODUCTION		
Section	I.	General	1-1	1-1
	II.	Theory	1-3	1-1
CHAPTER	2.	SAFETY PRECAUTIONS IN WELDING OPERATIONS		
Section	I.	General Safety Precautions	2-1	2-1
	II.	Safety Precautions in Oxyfuel Welding.	2-6	2-14
	III.	Safety in Arc Welding and Cutting	2-12	2-22
	IV.	Safety Precautions for Gas Shielded Arc Welding.	2-17	2-27
	V.	Safety Precautions for Welding and Cutting Containers That Have Held Combustibles.	2-19	2-28
	VI.	Safety Precautions for Welding and Cutting Polyurethane Foam Filled Assemblies.	2-30	2-38
CHAPTER	3.	PRINT READING AND WELDING SYMBOLS		
Section	I.	Print Reading.	3-1	3-1
	II.	Weld and Welding Symbols	3-4	3-3
CHAPTER	4.	JOINT DESIGN AND PREPARATION OF METALS	4-1	4-1
CHAPTER	5.	WELDING AND CUTTING EQUIPMENT		
Section	I.	Oxyacetylene Welding Equipment	5-1	5-1
	II.	Oxyacetylene Cutting Equipment	5-16	5-19
	III.	Arc Welding Equipment and Accessories.	5-18	5-22
	IV.	Resistance Welding Equipment	5-26	5-46
	V.	Thermit Welding Equipment.	5-27	5-50
	VI.	Forge Welding Tools and Equipment.	5-28	5-51

DISTRIBUTION RESTRICTION: Approved for public release; distribution is unlimited.

Table of Contents (cont)

		Paragraph	Page
CHAPTER 6.	WELDING TECHNIQUES		
Section I.	Description	6-1	6-1
II.	Nomenclature of the Weld	6-7	6-14
III.	Types of Welds and Welded Joints	6-10	6-20
IV.	Welding Positions	6-17	6-30
V.	Expansion and Contraction in Welding Operations	6-25	6-38
VI.	Welding Problems and Solutions	6-29	6-47
CHAPTER 7.	METALS IDENTIFICATION		
Section I.	Characteristics	7-1	7-1
II.	Standard Metal Designations	7-4	7-37
III.	General Description and Weldability of Ferrous Metals	7-10	7-45
IV.	General Description and Weldability of Nonferrous Metals	7-17	7-66
CHAPTER 8.	ELECTRODES AND FILLER METALS		
Section I.	Types of Electrodes	8-1	8-1
II.	Other Filler Metals	8-4	8-14
CHAPTER 9.	MAINTENANCE WELDING OPERATIONS FOR MILITARY EQUIPMENT	9-1	9-1
CHAPTER 10.	ARC WELDING AND CUTTING PROCESSES		
Section I.	General	10-1	10-1
II.	Arc Processes	10-8	10-23
III.	Related Processes	10-15	10-102
CHAPTER 11.	OXYGEN FUEL GAS WELDING PROCEDURES		
Section I.	Welding Processes and Techniques	11-1	11-1
II.	Welding and Brazing Ferrous Metals	11-13	11-23
III.	Related Processes	11-17	11-32
IV.	Welding, Brazing, and Soldering Nonferrous Metals	11-19	11-41
CHAPTER 12.	SPECIAL APPLICATIONS		
Section I.	Underwater Cutting and Welding with the Electric Arc	12-1	12-1
II.	Underwater Cutting with Oxyfuel	12-4	12-5
III.	Metallizing	12-6	12-6
IV.	Flame Cutting Steel and Cast Iron	12-15	12-16
V.	Flame Treating Metal	12-20	12-24
VI.	Cutting and Hard Surfacing with the Electric Arc	12-27	12-27
VII.	Armor Plate Welding and Cutting	12-33	12-31
VIII.	Pipe Welding	12-41	12-54
IX.	Welding Cast Iron, Cast Steel, Carbon Steel, and Forgings	12-46	12-65
X.	Forge Welding	12-48	12-71
XI.	Heat Treatment of Steel	12-50	12-72
XII.	Other Welding Processes	12-60	12-80

	Paragraph	Page
CHAPTER 13. DESTRUCTIVE AND NONDESTRUCTIVE TESTING		
Section I. Performance Testing	13-1	13-1
II. Visual Inspection and Corrections	13-4	13-2
III. Physical Testing	13-12	13-8
APPENDIX A. REFERENCES	A-1	A-1
APPENDIX B. PROCEDURE GUIDES FOR WELDING	B-1	B-1
APPENDIX C. TROUBLESHOOTING PROCEDURES	C-1	C-1
APPENDIX D. MATERIALS USED FOR BRAZING, WELDING, SOLDERING, CUTTING, AND METALLIZING	D-1	D-1
APPENDIX E. MISCELLANEOUS DATA	E-1	E-1
GLOSSARY	G-1	G-1
INDEX	I-1	Index-1

LIST OF ILLUSTRATIONS

Figure	Title	Page
2-1	Welding helmet and hand-held shield	2-2
2-2	Welding helmets and shields	2-4
2-3	Safety goggles	2-5
2-4	Protective clothing	2-5
2-5	Welding booth with mechanical ventilation	2-10
2-6	Process diagram for air carbon arc cutting	2-25
2-7	Circuit block diagram AAC	2-26
2-8	Safe way to weld container that held combustibles	2-37
3-1	Construction lines	3-3
3-2	Standard locations of elements of a welding symbol	3-4
3-3	Basic and supplementary arc and gas welding symbols	3-5
3-4	Process or specification references	3-5
3-5	Definite process reference	3-6
3-6	No process or specification reference	3-6
3-7	Weld-all-around and field weld symbols	3-8
3-8	Resistance spot and resistance seam welds	3-8
3-9	Arrow side fillet welding symbol	3-8
3-10	Other side fillet welding symbol	3-8
3-11	Plug and slot welding symbols indicating location and dimensions of the weld	3-9
3-12	Arrow side V groove welding symbol	3-9
3-13	Other side V groove welding symbol	3-9
3-14	Welds on the arrow side of the joint	3-10
3-15	Welds on the other side of the joint	3-10
3-16	Welds on both sides of joint	3-10
3-17	Spot, seam, and flash or upset weld symbols	3-10
3-18	Construction of symbols, perpendicular leg always to the left ..	3-12
3-19	Construction of symbols, arrow break toward chamfered member ...	3-12
3-20	Construction of symbols, symbols placed to read left to right ..	3-13
3-21	Combinations of weld symbols	3-13
3-22	Complete penetration indication	3-13
3-23	Construction of symbols, special types of welds	3-14
3-24	Multiple reference lines	3-14
3-25	Supplementary data	3-14
3-26	Supplementary symbols	3-14
3-27	Dimensions of fillet welds	3-15
3-28	Combined intermittent and continuous welds	3-16
3-29	Extent of fillet welds	3-16
3-30	Dimensions of chain intermittent fillet welds	3-17
3-31	Dimensions of staggered intermittent fillet welds	3-17
3-32	Application of dimensions to intermittent fillet weld symbols ..	3-17
3-33	Surface contour of fillet welds	3-18
3-34	Plug and slot welding symbols indicating location and dimensions of the weld	3-19
3-35	Surface contour of plug welds and slot welds	3-20
3-36	Surface contour of plug welds and slot welds with user's standard finish symbol	3-20
3-37	Slot weld dimensions	3-20
3-38	Dimensions of arc spot and arc seam welds	3-21
3-39	Extent of arc spot welding	3-21

3-40	Number of arc spot welds in a joint	3-22
3-41	Surface contour of arc spot and arc seam welds	3-22
3-42	Groove weld dimensions	3-22
3-43	Groove weld dimensions having no general note	3-23
3-44	Groove welds with differing dimensions	3-23
3-45	Groove weld dimensions for welds extending through the members joined	3-23
3-46	Groove weld dimensions for welds extending partly through the members joined	3-24
3-47	Dimensions of groove welds with specified root penetration	3-24
3-48	Flare groove welds	3-24
3-49	Root opening	3-25
3-50	Back or backing weld symbol	3-25
3-51	Surface contour of groove welds	3-25
3-52	Contours obtained by welding	3-26
3-53	Flush contour by machining	3-26
3-54	Convex contour by machining	3-26
3-55	Surface contour of back or backing welds	3-27
3-56	Melt-thru weld symbol	3-27
3-57	Surface contour of melt-thru welds	3-27
3-58	Size of surfaces built up by welding	3-28
3-59	Flange weld symbols	3-29
3-60	Size of resistance spot welds	3-30
3-61	Strength of resistance spot welds	3-30
3-62	Spacing of resistance spot welds	3-30
3-63	Extent of resistance spot weld	3-31
3-64	Number of resistance spot welds	3-31
3-65	Contour of resistance spot welds	3-31
3-66	Size of resistance seam welds	3-32
3-67	Strength of resistance seam welds	3-32
3-68	Length of resistance seam welds	3-32
3-69	Extent of resistance seam welds	3-33
3-70	Dimensioning of intermittent resistance seam welds	3-33
3-71	Contour of resistance seam welds	3-33
3-72	Embossment on arrow-side member of joint for projection welding	3-34
3-73	Embossment on other-side member of joint for projection welding	3-34
3-74	Diameter of projection welds	3-35
3-75	Strength of projection welds	3-35
3-76	Spacing of projection welds	3-35
3-77	Number of projection welds	3-35
3-78	Extent of projection welds	3-36
3-79	Contour of projection welds	3-36
3-80	Surface contour of lash or upset welds	3-36
4-1	The five basic types of joints	4-1
4-2	Inaccessible welds	4-4
5-1	Stationary oxygen cylinder manifold and other equipment	5-1
5-2	Station outlet for oxygen or acetylene	5-2
5-3	Stationary acetylene cylinder manifold and other equipment	5-2
5-4	Acetylene generator and operating equipment	5-3
5-5	Portable oxyacetylene welding and cutting equipment	5-4
5-6	Acetylene cylinder construction	5-6
5-7	Oxygen cylinder construction	5-8

LIST OF ILLUSTRATIONS (cont)

Figure	Title	Page
5-8	Single stage oxygen regulator	5-9
5-9	Two stage oxygen regulator	5-11
5-10	Mixing head for injector type welding torch	5-12
5-11	Equal pressure type general purpose welding torch	5-12
5-12	Oxyacetylene cutting torch	5-19
5-13	Diagram of oxyacetylene cutting tip	5-19
5-14	Cutting attachment for welding torch	5-20
5-15	Making a bevel on a circular path with a cutting machine	5-20
5-16	Machine for making four oxyacetylene cuts simultaneously	5-21
5-17	Cutaway view of DC welding generator	5-23
5-18	Direct current welding machine	5-24
5-19	Alternating current arc welding machine	5-25
5-20	Gas tungsten-arc welding setup	5-26
5-21	Argon regulator with flowmeter	5-27
5-22	TIG welding torch	5-27
5-23	MIG welding torch	5-29
5-24	Connection diagram for MIG welding	5-30
5-25	Metal-arc welding electrode holders	5-35
5-26	Atomic hydrogen welding torch	5-35
5-27	Chipping hammer and wire brush	5-35
5-28	Welding table	5-36
5-29	Molten metal transfer with a bare electrode	5-38
5-30	Arc action obtained with a light coated electrode	5-39
5-31	Arc action obtained with a shielded arc electrode	5-39
5-32	Electrode drying ovens	5-41
5-33	Correct electrode taper	5-41
5-34	Polarity of welding current	5-42
5-35	Effect of polarity on weld shape	5-43
5-36	AC wave	5-44
5-37	Rectified ac wave	5-44
5-38	Comparison of penetration contours	5-45
5-39	Resistance spot welding machine and accessories	5-47
5-40	Projection welding	5-49
5-41	Thermit welding crucible and mold	5-51
5-42	Portable forge	5-52
5-45	Blacksmith's anvil	5-53
6-1	Chart of welding processes	6-1
6-2	Equipment setup for arc stud welding	6-2
6-3	Equipment setup for gas shielded arc stud welding	6-3
6-4	Submerged arc welding process	6-3
6-5	Gas tungsten arc welding	6-4
6-6	Gas metal arc welding	6-5
6-7	Shielded metal arc welding	6-5
6-8	Furnace brazing operation	6-8
6-9	Typical induction brazing coils and joints	6-9
6-10	Chemical bath dip brazing	6-9
6-11	Infrared brazing apparatus	6-10
6-12	Steps in making a thermit weld	6-13
6-13	Nomenclature of welds	6-14
6-14	Heat affected zones in a multipass weld	6-16

6-15	Welding procedure schedule—various welds	6-17
6-16	Basic joint types	6-21
6-17	Butt joints in light sections	6-21
6-18	Butt joints in heavy sections	6-21
6-19	Corner joints for sheets and plates	6-22
6-20	Edge joints for light sheets and plates	6-23
6-21	Lap joints	6-23
6-22	Tee joint—single pass fillet weld	6-24
6-23	Edge preparation for tee joints	6-24
6-24	Applications of fillet welds—single and double	6-25
6-25	Basic groove welds	6-25
6-26	Typical weld joints	6-26
6-27	Types of groove welds	6-27
6-28	Surfacing, plug, and slot welds	6-28
6-29	Flash, seam, spot, and upset welds	6-29
6-30	Welding positions—groove welds—plate	6-30
6-31	Welding positions—fillet welds—plate	6-30
6-32	Welding positions—pipe welds	6-31
6-33	Diagram of tack welded pipe on rollers	6-33
6-34	Diagram of horizontal pipe weld with uphand method	6-33
6-35	Diagram of horizontal pipe weld with downhand method	6-34
6-36	Vertical pipe fixed position weld with backhand method	6-35
6-37	Deposition of root, filler, and finish weld beads	6-35
6-38	Work angle—fillet and groove weld	6-36
6-39	Travel angle—fillet and groove weld	6-36
6-40	Forehand welding	6-37
6-41	Backhand welding	6-37
6-42	Results of weld metal shrinkage	6-38
6-43	Methods of counteracting contractions	6-39
6-44	Quench plates used in the welding of sheet metal	6-40
6-45	Fixture used in the welding of sheet metal	6-41
6-46	Controlling expansion and contraction of castings by preheating	6-41
6-47	Cube of metal showing expansion	6-42
6-48	Longitudinal (L) and transverse (T) shrinkage stresses in a butt weld	6-43
6-49	Longitudinal (L) and transverse (T) shrinkage stresses in a fillet weld	6-43
6-50	Distortion in a butt weld	6-44
6-51	Distortion in a fillet weld	6-44
6-52	The order in which to make weld joints	6-46
6-53	Edge welded joint—residual stress pattern	6-48
6-54	Butt welded joint—residual stress pattern	6-49
6-55	Ductile fracture surface	6-53
6-56	Brittle fracture surface	6-54
6-57	Fatigue fracture surface	6-56
6-58	Corner joint	6-58
6-59	Tee joint	6-58
6-60	Redesigned corner joint to avoid lamellar tearing	6-59
6-61	Effect of ground location on magnetic arc below	6-61
6-62	Unbalanced magnetic force due to current direction change	6-62
6-63	Unbalanced magnetic force due to unbalanced magnetic path	6-63
6-64	Reduction of magnetic force due to induced fields	6-64
7-1	Tensile strength	7-5

LIST OF ILLUSTRATIONS

Figure	Title	Page
7-2	Shear strength	7-5
7-3	Compressive strength	7-6
7-4	Characteristics of sparks generated by the grinding of metals ..	7-12
7-5	Blast furnace	7-16
7-6	Conversion of iron ore into cast iron, wrought iron, and steel	7-18
7-7	How steel qualities change as carbon is added	7-45
7-8	Weld preparation	7-46
7-9	Heat input nomograph	7-57
7-10	Studding method for cast iron repair	7-65
7-11	Joint design for aluminum plates	7-69
7-12	Aluminum joint designs for gas metal-arc welding processes	7-73
7-13	Joint preparation for arc welding magnesium	7-87
7-14	Position of torch and welding rod	7-89
7-15	Minimizing cracking during welding	7-90
7-16	Baffle arrangements to improve shielding	7-99
7-17	Trailing shield	7-99
7-18	Backing fixtures for butt welding heavy plate and thin sheet ...	7-100
7-19	Use of weld backup tape	7-101
8-1	Transfer of metal across the arc of a bare electrode	8-7
8-2	Deposition rates of steel flux-cored electrodes	8-13
8-3	Correct electrode taper	8-15
10-1	Characteristic curve for welding power source	10-3
10-2	Curve for single control welding machine	10-3
10-3	Curve for dual control welding machines	10-4
10-4	Volt ampere slope vs welding operation	10-5
10-5	Volt ampere curve for true constant current machine	10-7
10-6	Pulsed current welding	10-8
10-7	Burn-off rates of wire vs current	10-9
10-8	Static volt amp characteristic curve of CV machine	10-10
10-9	Static volt amp curve with arc range	10-10
10-10	Various slopes of characteristic curves	10-11
10-11	Current density—various electrode signs	10-12
10-12	Electrical circuit	10-13
10-13	Welding electrical circuit	10-14
10-14	Arc characteristic volt amp curve	10-16
10-15	The dc tungsten arc	10-17
10-16	Arc length vs voltage and heat	10-18
10-17	The dc shielded metal arc	10-19
10-18	The dc consumable electrode metal arc	10-20
10-19	Sine wave generation	10-21
10-20	Sequences in multilayer welding	10-23
10-21	Schematic drawing of SMAW equipment	10-24
10-22	Elements of a typical welding circuit for shielded metal arc welding	10-25
10-23	Three types of free-flight metal transfer in a welding arc	10-25
10-24	Travel speed limits for current levels used for 1/8-inch- diameter E6010 SMAW electrode. Dashed lines show travel speed limits as determined by amount of undercut and bead shape	10-26

10-25	Travel speed limits for current levels used for 1/8-inch-diameter E6011 SMAW electrode. Dashed lines show travel speed limits as determined by amount of undercut and bead shape	10-27
10-26	Travel speed limits for current levels used for 1/8-inch-diameter E6013 SMAW electrode. Dashed lines show travel speed limits as determined by amount of undercut and bead shape	10-27
10-27	Travel speed limits for current levels used for 1/8-inch-diameter E7018 SMAW electrode. Dashed lines show travel speed limits as determined by amount of undercut and bead shape	10-28
10-28	Travel speed limits for current levels used for 1/8-inch-diameter E7024 SMAW electrode. Dashed lines show travel speed limits as determined by amount of undercut and bead shape	10-28
10-29	Travel speed limits for current levels used for 5/32-inch-diameter E8018 SMAW electrode. Dashed lines show travel speed limits as determined by amount of undercut and bead shape	10-29
10-30	Travel speed limits for current levels used for 1/8-inch-diameter E11018 SMAW electrode. Dashed lines show travel speed limits as determined by amount of undercut and bead shape	10-29
10-31	Shielded metal arc welding	10-32
10-32	Gas tungsten arc (TIG) welding (GTAW)	10-33
10-33	Gas tungsten arc welding equipment arrangement	10-34
10-34	Technique for manual gas tungsten arc (TIG) welding	10-37
10-35	Process diagram - keyhole mode - PAW	10-38
10-36	Cross section of plasma arc torch head	10-39
10-37	Transferred and nontransferred plasma arcs	10-43
10-38	Various joints for plasma arc	10-45
10-39	Circuit diagram - PAW	10-45
10-40	Quality and common faults	10-45
10-41	Deposition rates	10-47
10-42	Typical air cooled carbon electrode holders	10-48
10-43	Process diagram - CAW	10-50
10-44	Gas metal arc welding process	10-55
10-45	MIG welding process	10-55
10-46	Typical semiautomatic gas-cooled, curved-neck gas metal arc welding gun	10-57
10-47	Variation in volumes and transfer rate of drops with welding current (steel electrode)	10-61
10-48	Voltage versus current for E70S-2 1/16-inch-diameter electrode and shield gas of argon with 2-percent oxygen addition	10-63
10-49	Voltage versus current for E70S-2 1/16-inch-diameter electrode and carbon dioxide shield gas	10-63
10-50	Voltage versus current for E70S-3 1/16-inch-diameter electrode and shield gas of argon with 2-percent oxygen addition	10-84
10-51	Voltage versus current for E70S-3 1/16-inch-diameter electrode and carbon dioxide shield gas	10-84
10-52	Voltage versus current for E70S-4 1/16-inch diameter electrode and carbon dioxide shield gas	10-65
10-53	Voltage versus current for E70S-6 1/16-inch-diameter electrode and carbon dioxide shield gas	10-65
10-54	Voltage versus current for E110S 1/16-inch-diameter electrode and shield gas of argon with 2-percent oxygen addition	10-66
10-55	Flux-cored arc welding process	10-68
10-56	Equipment for flux-cored arc welding	10-69
10-57	Wire feed assembly	10-70

LIST OF ILLUSTRATIONS

Figure	Title	Page
10-58	Cross-section of a flux-cored wire	10-73
10-59	Block diagram--SAW	10-83
10-60	Process diagram--submerged arc welding	10-85
10-61	Weld joint designs for submerged arc welding	10-88
10-62	Deposition rates for single electrodes	10-90
10-63	Welds corresponding to table 10-23	10-92
10-64	Stickout vs deposition rate	10-96
10-65	Welding on rotating circular parts	10-97
10-66	Angle of slope of work vs weld	10-97
10-67	Angle of electrode vs weld	10-98
10-68	Two electrode wire systems	10-99
10-69	Strip electrode on surfacing	10-100
10-70	Welding with iron powder additives	10-101
10-71	Plasma arc torch terminology	10-102
10-72	Basic plasma arc cutting circuitry	10-105
10-73	Dual flow plasma arc cutting	10-106
10-74	Water injection plasma arc cutting arrangement	10-107
10-75	Process diagram for air carbon arc cutting	10-108
10-76	Air carbon arc cutting diagram	10-109
10-77	Resistance spot welding process	10-113
10-78	Flash welding	10-116
10-79	Friction welding process	10-118
10-80	Electron beam welding process	10-120
11-1	The temperature of the flame	11-7
11-2	Oxyacetylene flames	11-8
11-3	What MAPP gas flames should look like	11-11
11-4	Forehand welding	11-13
11-5	Backhand welding	11-14
11-6	The fillet used to make the five basic joints	11-15
11-7	Fillet weld throat dimension	11-16
11-8	Fillet weld size vs strength	11-16
11-9	Welding position--fillet and groove welds	11-18
11-10	Welding a butt joint in the horizontal position	11-19
11-11	Bead welding without a welding rod	11-20
11-12	Bead welding with a welding rod	11-20
11-13	Position of rod and torch for a butt weld in a flat position ...	11-21
11-14	Welding a butt joint in the vertical position	11-22
11-15	Welding a butt joint in the overhead position	11-23
11-16	Silver brazing joints	11-32
11-17	Starting a cut and cutting with a cutting torch	11-34
11-18	Procedure for oxyacetylene cutting of cast iron	11-35
11-19	Coupling distance	11-39
11-20	Torch angle	11-39
12-1	Arrangements for underwater welding	12-3
12-2	The wire metallizing process	12-6
12-3	Electric arc spraying process	12-11
12-4	Flame spray process	12-13
12-5	Plasma spray process	12-13
12-6	Process diagram of oxygen cutting	12-17
12-7	Manual oxygen cutting torch	12-19

12-8	Methods of preparing joints	12-19
12-9	Procedure for oxyacetylene cutting of cast iron	12-23
12-10	Operations and time intervals in flame descaling prior to painting	12-25
12-11	Removal of countersunk rivets	12-26
12-12	Removal of buttonhead rivets	12-27
12-13	Method of cutting stainless steel welds	12-34
12-14	Method of removing surface defects from stainless steel welds ..	12-35
12-15	Preparation for welding cracks in homogenous armor plate	12-37
12-16	Backing methods for depositing weld beads at the root of a double V joint	12-38
12-17	Sequence of passes when depositing weld beads on homogenous armor plate	12-39
12-18	Common defects when welding root beads on homogenous armor plate and the remedial procedures	12-40
12-19	Procedure for welding single V joint on homogenous armor plate	12-41
12-20	Double V weld on homogenous armor plate	12-42
12-21	Butt strap welds on cracked armor plate	12-43
12-22	Emergency repair of shell penetration through armor	12-44
12-23	Double V plug welding procedure for repairing shell penetration in homogenous armor plate	12-44
12-24	Correct and incorrect plug weld preparation for repairing shell penetration in homogenous armor plate	12-45
12-25	Welding homogenous armor without welding butt strap	12-47
12-26	Welding repair of gouges in surface of homogenous armor plate ..	12-47
12-27	Welding joint data for butt welds on face hardened armor	12-49
12-28	Use of butt strap on face hardened armor to repair cracks or gaps	12-50
12-29	Butt strap weld on face hardened armor	12-51
12-30	Weld joint data for corner welds on face hardened armor plate ..	12-51
12-31	Procedure for welding face hardened armor over 1/2 in. thick, using the double V joint method	12-52
12-32	Procedure for welding face hardened armor up to 1/2 in., using the depressed joint method	12-53
12-33	Seal bead weld	12-54
12-34	Angle iron serving as jig for small diameter pipe	12-55
12-35	Types of backing rings	12-56
12-36	Template pattern, ell joint, first step	12-58
12-37	Template pattern, ell joint, second step	12-58
12-38	Template pattern, ell joint, third step	12-59
12-39	Tee joint	12-59
12-40	Template pattern, tee joint, first step	12-60
12-41	Template pattern, tee joint, second step	12-60
12-42	Diagram of tack welded pipe on rollers	12-62
12-43	Diagram of horizontal pipe weld with uphand method	12-62
12-44	Diagram of horizontal pipe weld with downhand method	12-63
12-45	Vertical pipe fixed position weld with backhand method	12-64
12-46	Deposition of root, filler, and finish weld beads	12-64
12-47	Studding method for cast iron repair	12-67
12-48	Forge welds	12-72

12-50	Schematic diagram of resistance spot welder	12-81
12-51	Schematic diagram of upset and flash welder	12-82

LIST OF ILLUSTRATIONS

Figure	Title	Page
13-1	Guided bend test jig	13-9
13-2	Guided bend test specimens	13-9
13-3	Guided bend and tensile strength test specimens	13-10
13-4	Free bend test of welded metal	13-11
13-5	Nick break test	13-12
13-6	Tensile strength test specimen and test method	13-13
13-7	Portable tensile strength and bend testing machine	13-13
13-8	Internal weld defects disclosed by X-ray inspection	13-15
C-1	Distortion	C-18
C-2	Warping	C-18
C-3	Poor appearance	C-19
C-4	Stress cracking	C-19
C-5	Poor penetration	C-19
C-6	Porous weld	C-20
C-7	Poor fusion	C-20

LIST OF TABLES

Number	Title	Page
2-1	Lens Shades for Welding and Cutting	2-3
2-2	Required Exhaust Ventilation	2-10
3-1	Designation of Welding Process by Letters	3-6
3-2	Designation of Cutting Processes by Letters	3-7
4-1	Welds Applicable to the Basic Joint Combinations	4-2
5-1	Low Pressure or Injector Type Torch	5-15
5-2	Balanced Pressure Type Torch	5-16
5-3	Oxyacetylene Cutting Information	5-21
5-4	Coating, Current, and Polarity Types Designated by the Fourth Digit in the Electrode Classification Number	5-37
6-1	Preheating Temperatures	6-52
7-1	Physical Properties of Metals	7-2
7-2	Mechanical Properties of Metals	7-4
7-3	Hardness Conversion Table	7-8
7-4	Summary of Identification Tests of Metals	7-10
7-5	Summary of Spark Test	7-13
7-6	Approximate Hardness of Steel by the File Test	7-15
7-7	Carbon Content of Cast Iron and Steel	7-17
7-8	Standard Steel and Steel Alloy Number Designations	7-38
7-9	AISI-SAE Numerical Designation of Carbon and Alloy Steels	7-40
7-10	Standard Aluminum and Aluminum Alloy Number Designations	7-41
7-11	Letters Used to Identify Alloying Elements in Magnesium Alloys	7-41
7-12	Composition of Magnesium Alloys	7-42
7-13	Copper and Copper Alloy Designation System	7-43
7-14	Electrode Numbers	7-55
7-15	Electrodes in the Army Supply System	7-55
7-16	Suggested Preheat Temperatures	7-56
7-17	Maximum Heat Inputs for T1 Steel	7-58
7-18	Maximum Heat Inputs for T1 Type A and Type B Steels	7-58
7-19	Welding Processes and Filler Metals for Cast Iron	7-60

7-20	Designation of Aluminum Alloy Groups	7-67
7-21	Welding Procedure Schedules for Gas Metal-Arc Welding (GMAW) of Aluminum (MIG Welding)	7-71
7-22	Welding Procedure Schedules for AC-GTAW Welding of Aluminum (TIG Welding)	7-74
7-23	Welding Procedure Schedules for DC-GTAW Welding of Aluminum (TIG) Welding	7-75
7-24	Magnesium Weld Data	7-89
7-25	Magnesium Stress Relief Data	7-91
7-26	Welding Procedure Schedule for Gas Tungsten Arc Welding (GTAW) of Magnesium (TIG Welding)	7-92
7-27	Welding Procedure Schedules for Gas Metal Arc Welding (GMAW) of Magnesium (MIG Welding)	7-93
7-28	Welding Procedure Schedule for Metal-Arc Welding (GMAW) of Titanium (MIG Welding)	7-97
7-29	Welding Procedure Schedules for Gas Tungsten Arc Welding (GTAW) Nickel Alloys (TIG Welding)	7-107
7-30	Welding Procedure Schedules for Gas Metal Arc Welding (GMAW) Nickel Alloys (MIG Welding)	7-108
8-1	Mild Steel Electrode Wire Composition for Submerged Arc Welding	8-9
8-2	A.W.S. Filter Metal Specification and Welding Processes	8-23
10-1	Established Voltage Limits	10-30
10-2	Welding Position Capabilities	10-41
10-3	Base Metals Weldable by the Plasma Arc Process	10-42
10-4	Base Metal Thickness Range	10-42
10-5	Weld Procedure Schedule--Plasma Arc Welding--Manual Application	10-47
10-6	Method of Applying Carbon Arc Processes	10-49
10-7	Welding Position Capabilities	10-49
10-8	Welding Procedure Schedule--Galvanized Steel--Braze Welding	10-52
10-9	Welding Procedure Schedule for Carbon Arc Welding Copper	10-52
10-10	Welding Current for Carbon Electrode Types	10-53
10-11	Welding current for carbon electrode (twin torch)	10-54
10-12	Mechanical Property Requirements of Carbon Steel Flux-Cored Electrodes	10-74
10-13	Performance and Usability Characteristics of Carbon Steel Flux Cored Electrodes	10-75
10-14	Chemical Composition Requirements of Carbon Steel Flux Cored Electrodes	10-75
10-15	Mechanical Property Requirement of Low Alloy Flux-Cored Electrodes	10-76
10-16	Impact Requirement for Low Alloy Flux-Cored Electrodes	10-77
10-17	Chemical Composition Requirements for Low Alloy Flux-Cored Electrodes	10-78
10-18	Weld Metal Chemical Composition Requirements for Stainless Steel Electrodes	10-80
10-19	Shielding	10-81
10-20	Recommended Cable Sizes for Different Welding Currents and Cable Lengths	10-82
10-21	Base Metals Weldable by the Submerged Arc Process	10-86
10-22	Base Metal Thickness Range	10-87
10-23	Welding Procedure Schedules for SAW	10-93
10-24	Typical Analysis and Mechanical Properties of Submerged Arc Flux-Wire Combinations	10-103
